

Streamline Tuition Experience for Schools and Families

Flexible tuition payments, real-time revenue insights, and happier connected families

The tuition management process is the cornerstone of financial stability for your school and your families. With BigSIS, your school can set automated billing and reminders to encourage on-time payments and track tuition efficiently.

BigSIS Tuition Management streamlines each step, assuring families a positive, seamless experience as well as increasing on-time payments and informed decision-making, promoting financial health and long-term school revenue growth.

BigSIS Tuition Management

meets families where they are, offering a 24/7 single sign-on portal, protecting confidential financial data, and lightening the workload of your employees handling manual processes.

“

We wanted to take things digital to streamline processes for our families and staff. We made the switch to BigSIS not only because it is cloud-based, but because the parent portal delivers a self-service experience for our families. For example, we set up a family tuition contract and have them sign it and select their contract preferences through the portal—now they can choose payment dates, installments, and more.

A Unified Tuition Experience for Schools and Families

Strengthen Your School's Financial Health

By having a flexible tuition payment schedule in place, schools benefit from more on-time payments, spend less time worrying over late payments, and can focus on planning for future financial needs and target growth initiatives.

Provide Cloud-Based Convenience and Data Security

Families and staff benefit from a 24/7 user-friendly experience across all devices, including mobile phones and tablets. Our cloud-based system makes information accessible at school, home, or on the go and offers premium data security for all financial information.

Create Unique Payment Plans Giving Families More Choices

Give your families more choice and customized options for paying tuition and associated costs. Families can select installment plans on a schedule of their choice and schedule automated payments using their preferred payment method. Schools can easily create grade level tuition fees, deposits, reminders, and payment plans.

BigSIS can also be paired with powerful Community Brands private school K-12 solutions supporting premium admissions, boosted parent communications, fund accounting, equitable financial aid, and advanced fundraising.

Unlock Real-time Financial Insights

What if your school had the power to access and gain real-time financial reporting insights with just a few clicks? With BigSIS, schools can easily create customized reporting to inform long-term growth initiatives and fundraising goals. And financial reporting can be easily integrated with QuickBooks or Microsoft Excel—or an advanced accounting system, such as *MIP Fund Accounting*.

Support Your Families with Tuition Payment Flexibility

Your families are unique and that includes having different financial budgetary needs. Offering families opportunities to pay tuition at a pace that meets their unique needs adds value to your relationships while ensuring more on-time payments.

Connecting Your Entire School Community

BigSIS supports your entire school community from first click to graduation with admissions, enrollment, academics, student management, and fundraising capabilities, forming a unified school solution that streamlines administrative processes, fuels your school mission, and delights your families.
