

Safeguard School Data with Advanced K-12 Technology

Are you looking for a dependable and secure student information system (SIS) that caters to your school's specific requirements? Look no further than **Ravenna Student Management™**. As your trusted partner in K-12 school technology, we offer robust cloud-based servers, cutting-edge data security measures, and a dedicated support team. Our goal is to safeguard your school information, allowing you to concentrate on your most pressing priorities. Explore the features designed to enhance your security and data privacy operations.

Secure Access You Can Count On

Dependable Hosting Infrastructure

Fast, reliable servers offer seamless access to the most current data for informed decision-making.

Continuous Monitoring and Support

Your school site is monitored 24/7/365. You can also reach out to our friendly support team at any time if you need assistance.

Harnessing the Power of Cloud Technology

Cloud-hosted on Microsoft Azure, Ravenna Student Management offers scalable hosting with multiple global data centers.

99%+ Site Uptime Reported

Ensure Ongoing Data Integrity

Security Compliance

Compliance with industry security standards designed to protect data at school, home, or on the go.

Secure Encryption

Nightly, encrypted backups to the cloud and offsite servers for data preservation.

Strengthened Login Security

Increase security with strong passwords and accounts that auto-lock after multiple login failures.

Ongoing Platform Maintenance

Our team conducts regular software updates, maintenance, and testing to ensure platform stability and security.

Restricted Access Protocols

Role-based access permissions allow data access only by approved users.
